

Donauchem GmbH

Tariff regulations for packages

These tariff regulations apply to all agreements concluded between Donauchem GmbH and its customers, under which Donauchem GmbH hands over the goods to the customer in pledged, rented or loaned containers. When the containers are physically taken over, these tariff regulations become part of the contract. Deviations from these tariff regulations require our express, written consent.

Canisters and barrels – deposit containers

- a) By order of our customer we provide canisters and barrels against payment of a deposit (amount of money). The deposit is shown as such on the invoice and paid by the customer together with the goods.
- b) Containers can be returned without extra cost for transportation with a new delivery.
- c) If the containers are returned in fully used, non-expired and proper condition, the customer will receive a credit note for the full deposit amount. The important factor here is that the containers were purchased from Donauchem GmbH.

Plastic IBC – deposit containers:

- a) By order of our customer we provide plastic IBCs against payment of a deposit (amount of money). The deposit is shown as such on the invoice and paid by the customer together with the goods.
- b) The IBC deposit containers are individualised so that a concrete allocation is possible.
- c) Return of IBC deposit containers: The customer is obliged to return the containers made available to him within a period of 180 calendar days from receipt of the containers. With the proper return/collection, the customer receives a full refund of the deposit. Refunds are only possible with an intact label on the IBC deposit container. A return of the container after expiry of the period is rejected. IBCs which are returned after the period of 180 days, will not be refunded and are disposed of.
- d) Containers can be returned without extra cost for transportation with a new delivery.
- e) Realisation/collection of the deposit (amount of money): If the refundable deposit container is not returned within the period of 180 days, we are entitled to realise the entire deposit (deposit amount), i.e. to collect it. The customer becomes the owner of the container upon realisation of the deposit amount.
- f) If the deposit container is returned on time, but is damaged or so heavily contaminated that it can no longer be cleaned at reasonable economic expense, we are entitled to refuse the return of the deposit container and to liquidate/collect the deposit (deposit amount) in its full amount. With the realisation of the deposit, the customer becomes the owner of the container..*
- g) If non-reversible changes are made to the deposit container by the customer, we are entitled to refuse to take back the container and are entitled to realise/collect the deposit (deposit amount).

Container rental - only for steel IBCs

By order of our customer we rent out our steel IBCs under the following conditions:

- a) The rent begins with the takeover of the IBC and ends with its return to us or through our termination.
- b) The first 2 months are rent-free.
- c) If the IBCs are not returned after expiry of the 2 months, one month's rent shall be paid from the third month commenced and for every further month commenced until the IBC is returned or until we cancel the rental agreement.
- d) The rental invoices are drawn up monthly and are due within 14 days.

Cleaning and maintenance costs for rental and deposit containers*

We charge a fee for cleaning (normal, average contamination), checking the containers for leaks and functionality, repairing minor damage for all rental and deposit containers handed over. The fee is shown on the invoice.

Non-returnable containers

For all EEC packaging materials such as sacks, paper, carton, cardboard, wood, metal drums, plastics or foils (e.g. also plastic packaging with content are subject to labelling under the Chemicals Act and which are not on the "black list") packaging compliance fees are paid by Donauchem GmbH in accordance with the Packaging Regulation (ARA licence no. 1213). The compliance fees for non-returnable packaging are set out in our product prices.
